INDEX TO VOL. VI.

ALLISON, V. D., the antigenic properties of lysozyme-dissolved vaccines, 99
——— see *Fleming, A.*
Anti-dysentery serum, standardization of, 84
ATKIN, E. E., the significance of serological types of gonoccus, 235

B. anthracis, influence of the site of inoculation on infectivity, 146
B. diphtheriæ, virulence of, 225
B. pestis, immunization against, 207
B. tetani, agglutination and toxicity of, 91
——— isolation, morphology and cultural reactions of, 62
B. tuberculosis, a specific precipitating substance from, 197
BAKER, A. H., a useful preservative for whole blood, 201
BAKER, S. L., and DODDS, E. C., obstruction of the renal tubules during the excretion of hæmoglobin, 247
BARLOW, P. L., see *McIntosh, J.*
BARNARD, J. E., cultures from single cells, 39
BENIANS, T. H. C., see *Panton, P. N.*
Blood, a preservative for, 201

CARR, M., see *Korenchevsky, V.*
Castration, influence on metabolism, 21
COHEN, I., variations in the blood and urine diastase contents in relation to meals, 173
Colloids, physiological action of, 1
CRAMER, W., innervation as a factor in the experimental production of cancer, 71
Culture media, structures resembling colonies in, 36
——— use of indicator dyes in, 291
Cultures from single cells, 39
——— tissue, effect of embryonic tissue extracts on mitosis, 279
——— ——— *in vitro*, 53

DANIELS, W. B., plasma-lipoids in renal disease, 283
Dental caries, ætiology of, 260, 266
Diastase, activity in blood and urine, 314
——— variations of, in the blood and urine, 173
Diphtheria toxin and antitoxin, antigenic properties of precipitates, 112
DODDS, E. C., an investigation into the ætiology of dental caries. V. The chemical composition of saliva, 266
——— see *Baker, S. L.*
DOUGLAS, S. R., and MEANWELL, L. J., a new method for the concentration of bacilli in tuberculous milk, 203
DUDLEY, H. W., see *Laidlaw, P. P.*
DUDLEY, S. F., the virulence of *Corynæbacterium diphtheriæ*, especially of the atoxic subspecies, 225

Encephalitis lethargica, relation of, to herpes, 41
——— virus of, 123
Epileptics, ammonia in the blood of, 276
Ether-soluble constituents of serum, 180

Fat, estimation of, in fæces, 139
FILDES, P., tetanus. I. Isolation, morphology and cultural reactions of *B. tetani*, 62
——— ——— II. Agglutination and toxicity of *B. tetani*, 91
FINDLAY, G. M., a contribution to the ætiology of experimental keratomalacia, 16
FLEMING, A., and ALLISON, V. D., on the specificity of the protein of human tears, 87
FLOREY, H., see *Stephens, J. G.*

Gonococcus, serological types of, 235

HARRISON, G. A., on the differential estimation of fat in fæces, 139
HARTLEY, P., the antigenic properties of precipitates produced by the interaction of diphtheria toxin and antitoxin, 112
——— observations on the *rôle* of the ether-soluble constituents of serum in certain serological reactions, 180
Herpes, virus of, 41
HORGAN, E. S., non-specific stimulation of antibodies: the effect of manganese on agglutinins, 108

JAMES, W. W., see *McIntosh, J.*
JÜRGENS, A., see *Kristensen, M.*

Keratomalacia, experimental, ætiology of, 16
KORENCHEVSKY, V., the sexual glands and metabolism. I. Influence of castration on nitrogen and gaseous metabolism, 21

KORENCHEVSKY, V., the sexual glands and metabolism. III. The influence of injections of testicular or ovarian emulsions upon the nitrogen and gaseous metabolism of dogs and rabbits, 158
——— and CARR, M., the sexual glands and metabolism. II. Influence of emulsions of testis and prostate upon the nitrogen metabolism of rats, 74
KRISTENSEN, M., LESTER, V., and JÜRGENS, A., on the use of trypsinized casein, broml thymol blue, bromcresol purple, phenored and brilliant green for bacteriological nutrient media, 291

LAIDLAW, P. P., on structures which develop in certain culture media and resemble colonies of micro-organisms, 36
——— and DUDLEY, H. W., a specific precipitating substance from tubercle bacilli, 197
LESTER, V., see *Kristensen, M.*
LITTLE, W. L., and WRIGHT, N. C., the ætiology of milk fever in cattle, 129
LUCK, J. M., THACKER, G., and MARRACK, J., ammonia in the blood of epileptics, 276
Lysozyme, antigenic properties of vaccines dissolved by, 99

MCINTOSH, J., JAMES, W. W., and BARLOW, P. L., an investigation into the ætiology of dental caries. IV. Accessory factors in dental caries. (1) Reaction of the saliva. (2) Acid resistance of teeth. (3) Bacteriotropic action of saliva, 260
Manganese, effect on agglutinins of, 108
MARRACK, J., studies on œdema. I. The electrolyte concentration in the body fluids in nephritis with œdema, 135
——— see *Luck, J. M.*
MEANWELL, L. J., see *Douglas, S. R.*
Measles, rabbits as experimental animals in, 210
Metabolism, influence of sexual glands on, 21, 74, 158
Milk, tuberculous, concentration of bacilli in, 203
Milk-fever, ætiology of, in cattle, 129
MOTTRAM, J. C., the *in vitro* cultivation of tissues with reference to the production of cancer by means of radium and X-rays, 53

Nitrogen metabolism, 21, 74, 158
Nomogram for use in the calculation of diets, 14

O'BRIEN, R. A., and RUNGE, B. F., the standardization of anti-dysentery (Shiga) serum. II., 84
Œdema, electrolyte concentration in the body fluids, 135

PANTON, P. N., and BENIANS, T. H. C., the influence of the site of inoculation upon the infectivity of anthrax bacilli and pneumococci for laboratory animals, 146
PERDRAU, J. R., the virus of herpes; its immune reactions and its relation to that of encephalitis lethargica, 41
——— the virus of encephalitis lethargica, 123
Platelets, effect of deficiency of vitamin A, 312
Pneumococcus, influence of the site of inoculation on infectivity, 146
PURDY, W. J., rabbits and experimental measles: with some observations on blood-counts and rabbit temperatures, 210

Radium, production of cancer by, 53
REID, C., diastatic activity in blood and urine, 314
Renal disease, plasma-lipoids in, 283
——— tubules, obstruction of, during excretion of hæmoglobin, 247
RUNGE, B. F., see *O'Brien, R. A.*

SCHÜTZE, H., plague immunization in guinea-pigs and rats, 207
Sexual glands and metabolism, 21, 74, 158
SMART, W. A. M., a rotary nomogram for use in the calculation of diabetic and other diets, 14
STAMMERS, A. D., on the effect of deficiency of vitamin A on the blood-platelet count in rats, 312
STEABBEN, D. B., studies on the physiological action of colloids. I. The action of colloidal substances on blood elements and antibody content, 1
STEPHENS, J. G., and FLOREY, H., an investigation of the immediate effects of X-rays on living animal tissues, 269

Tears, specificity of the protein of, 87
THACKER, G., see *Luck, J. M.*
Tumours, malignant, glycolytic activation by extracts, 300
——— ——— innervation in the experimental production of, 71
——— ——— production of, by radium and X-rays, 53

Vitamin, effect of deficiency on platelet count, 312

WATERMAN, N., glycolytic activation by tumour extracts, 300
WRIGHT, G. P., the relation between the extent of mitosis seen in chick fibroblasts and the concentration of embryonic tissue extracts present in the tissue culture medium, 279
WRIGHT, N. C., see *Little, W. L.*

X-rays, immediate effects on living tissues, 269
——— production of cancer by, 53
